EDUCATION:

Qualification/Degree	School/College	University or Board	CGPA/%	Year
ONLINE MCA	Manipal University	Manipal University	8.1	2023-2025
BCA	Chitkara University	Chitkara University	9.49	2020-2023
Class XII	Shri Krishna Pranami Public Sr. Sec.School	CBSE	88.75	2018 - 2019
Class X	Shri Krishna Pranami Public Sr. Sec.School	CBSE	10	2016 - 2017

TRAINING:

Seven Months of experience in .Net Technology at Techrbm(Mohali) as a .Net developer Intern. As an Intern, I need to work on the project given by our Head Team Leader and gave report to him daily through meeting.

PROJECTS:

• Fast-Pizza

A fully responsive web application made by html, tailwind css and React js.I can order pizza from the menu,add or delete the pizza. Items are added in the cart with calculations. User can select his address through Map.I have used Rest api for displaying the menu items. I also used React Redux for managing different states of cart and user.I used Redux Thunk for fetching the data.
(Redux,useReducer,React Router, Reusability,props,useEffect hook concept is used).

• Worldwide

A SPA web application made by html,css and React js in which I can tap to any country or city on the displayed map. And then we have city and country list in which our selected cities is shown and we can add notes and date of the trip. We can also get our location on the map.I have used geolocation api and leaflet library for displaying the map and location.
(Context API + useReducer,React Router, Reusability , splitting of components,State,props,useEffect hook concept is used).

• Atomic Blog

A web application made by html,css and React js in which multiple post are shown.Also,we can search for the posts in search bar and we can add a post by giving its title and body.We can also see the archieve posts. A night mode is also there we can shift from night mode to light.(Context API, Reusability , splitting of components,State,props,useEffect hook concept is used).

• UsePopcorn

A web application made by html,css and React js in which we can search for a movie from an API call, select that movie, give 5 star rating, add to watched list.(Component composition, Reusability , splitting of

components,State,props,useEffect hook concept is used).

- **React Quiz**

A web application made by html,css and React js in which there are 15 MCQ and user has a time limit for completing the quiz.(Context api with UseReducer hook, component composition,props concept is used.)

- **Todo List**

A web application made by using MUI components and React js. In this application we can see our todos task, we can add the new task and also update the task and status of task.(Context api,React router,State,Props,useEffect hook concepts are used).

- **Far Away**

A web application made by using html,css and React js in which we can add the custom items for going to the trip,unchecked and checked them and delete them. (Props,State,controlled elements,adding and deleting element concept is used).

- **Eat-n-Split**

A web application made by using html,css and React js in which you can split the bill between you and your friend. (State,props, controlled element,adding and removing data concepts are used).

- **Guess My Number**

A web application in which we have to guess a number and that no is then checked with random guess no generated.Score and high score are calculated from this.DOM Manipulation and Events concept is used in this project.

- **Roll-n-Dice**

A web application purely made by html,css and javascript in which two person can hold and roll and their scores are calculated and the highest score player won. DOM Manipulation,ClassList and Events concept of javascript is used.

- **Bankist**

A web application made by purely html,css and javascript in which we can request a loan, transfer money to another person, and close account and the balance is updated in UI, deposits and withdrawal are shown of a person account.(Various Arrays methods are used like map,filter,reduce,find).

- **Omnifood**

A responsive web application made by pure html and Css in which a person can see the food we are offering.There are many sections like hero,featured in,how it works,tetimonials,pricing,call to action,footer.

- **CRUD Operation**

A web application made by using .Net Technology in which we can perform create,read,update and delete operation and the data is stored in SQL Server.

- **Various Login and home page**

Netflix login page, facebook login page and Microsoft Home pageclone made by pure html and Css.

PROFESSIONAL SKILLS:

HTML	CSS,Tailwind CSS
Javascript	React js
Java	C
DSA	ASP .NET MVC
SQL Server	Visual Studio Code

CERTIFICATIONS:

- Css certified from Udemy
- Javascript certified from Udemy
- React js certified from Udemy
- Cisco verified in Introduction to Cyber Security and cybersecurity Essentials
- Html,Css,Javascript,Java,C,C++ certified from Solo Learn.
- Ms-office(Ms-word,Ms-Excel,Ms-Powerpoint), Typing(45wpm) certified from Govt. Institute.

CULTURAL:

- Participated in Yoga Competition at district level.
- Certificate of scout and guides of basic level.

CO-CURRICULAR ACTIVITIES:

- Member of Photography club at Chitkara University.
- Member of Math Pirates club at Chitkara University.
